Safety Direction

1. For the first operation, it is advisable to read the manual carefully before hand and keep it properly for future use.
2. Before the first operation, make sure the dust cup is properly installed.
3. Make sure the power supply is 220-240V 50Hz
4. Do not vacuum water and inflammable material
5. Do not vacuum burning material and ashes
6. Do not use the machine without a motor protection filter filled
7. Disconnect power before changing attachments, removing dust container and maintaining appliance.
8. Please change the dust cup/HEPA immediately when it is damaged.
9. Do not store or use the machine close to high temperature places
10. Do not let children use the machine in case of any danger
11. If abnormal noise, smell, smoke or any other failure or breakage was found during the operation, you should turn off the switch and unplug it. Then contact with your service center for repair. Do not repair it by yourself.
12. If the supply cord is damaged, it must be replaced by the manufactures or its service agent or a similarly qualified person in order to avoid a hazard

HOW TO USE

ASSEMBLY BEFORE USE

Fig.1 shows the connection of the hose and the vacuum cleaner:

Put the hose connector in front of the vacuum cleaner .Then insert it into the inlet hole . If you want to disassemble it, you can press the release button and then pull it out.

Fig.2 shows the connection of the hose and the extending metal tube:

Hold the flexural connector of the hose and put it into the bigger hole of the tube.

Fig.3 shows the connection of the tube and the brush tool:

Put the metal tube into the hole of the brush and rotate it to fasten them.

Fig.4 shows how to check the winding of the power cord.

You can pull the power cord out of the machine and stop it when you see the yellow mark. Make sure the red mark is not out. When your sweep is over, first turn off the power, pull the plug out of the socket, and then push the winding device button until the cord is completely in the machine.

Fig.5 shows the power button

Put the plug into the socket, push the power button to control the work of the machine.

MAINTENANCE

HOW TO MAINTAIN

1. The filter should be cleaned twice a year, and when there is obvious dirt on the filter, it is time.
2. You must fix the filter properly before running the vacuum cleaner.
3. The filter can't be cleaned in the washing machine or baked by the blower.
4. It will reduce the suction power and damage the motor if you use the wet filter.
5. Steps for maintenance:
 - 1) As in fig.14, press the outlet lock to open the outlet board.
 - 2) As in fig.15, get out the outlet filter.

- 3) As in fig.16, rotate the HEPA cover to separate it from the dust cup cover
- 4) As in fig.17, get the HEPA cover
- 5) As in fig.18, take the filter out and tap it to remove the dust. If necessary, you can rinse it under water tap.
- 6) Wash the HEPA cover, the HEPA assembly, the outlet sponge and the dust chamber in the water without detergent and dry them before use. Don't use any tools to brush the HEPA filter paper, otherwise the HEPA filter will be damaged and filtration effect will be affected.
- 7) Fix the HEPA assembly on the chamber cover and make sure three salient cubes should be stuck in the grooves of the dust chamber.
- 8) Rotate the HEPA assembly in the direction of the mark on the chamber cover.
- 9) Assemble the chamber cover assembly and the dust chamber according to the mark outside.
- 10) Put the dust chamber assembly into the machine. And in this process, first you should make the chamber in the right position and then press the handle of the dust chamber, if there is a cluck it means the operation is successful.
